

TCD Robot DOLPHIN^{XF}

Dare to Imagine!

Proudly introducing the **Dolphin/XF**, the most advanced and unique bilateral TCD robot in the market! Quickly scans the cerebral circulation and automatically assists in identifying blood flow velocities on the right and left sides of the brain. Using the **Dolphin/XF** is fast, simple and stable. Ideal for monitoring in the ICU, OR, and TCD lab, and for a range of specialty tests such as PFO or VMR tests.

Selected Features:

- › Automatic Bilateral Scan
- › Auto Search along the Ultrasound Beam
- › Position Memory and Maximum Position Accuracy
- › Scan Across all Depths
- › “Heat Maps” Identifying Cerebral Vessels
- › Dedicated Dolphin/XF Head Gear
- › Simple and Intuitive User Interface
- › Interactive Robot Position Map
- › Fast Scan Option in just a few Seconds
- › Fully Compatible with all Dolphin TCD models

Robotic Bilateral Scan
